Kenda ®
Kikuyu Turf

Sun loving and hard wearing

High drought tolerance. Bright green colour all year-round.

Appearance
- ☑ Bright green colour all year-round
- ☑ Soft to the touch and underfoot
- ☑ Fine-medium leaf
- ☑ Dense growth

Features
- ☑ Highly durable and resilient
- ☑ Very high wear tolerance
- ☑ Good weed resistance due to dense growth
- ☑ Good resistance to diseases
- ☑ Grows in most soil types
- ☑ Bred to produce a sterile seed head meaning less chance of spreading into garden beds
- ☑ Produces low seed head (a common irritant for people with allergies)

Climatic performance
- ☑ Thrives in full sun
- ☑ High drought tolerance
- ☑ High cold tolerance
- ☑ Grows in most parts of Australia

Environmental benefits
- ☑ Low water usage
- ☑ Reduced fertiliser requirements
- ☑ Reduced herbicide requirements

Sun loving and hard wearing

Kenda® Kikuyu handles all kinds of wear and tear – whether it's from large dogs, active kids or regular backyard parties – and looks good while doing it.

Kenda® has a strong root system that grows vigorously. The result is a lawn that establishes quickly, is incredibly wear tolerant and has an excellent recovery rate.

Unlike common Kikuyu, Kenda® grass is bred to be sterile and produce minimal seed head meaning it is less likely to spread into surrounding garden beds or onto foot paths.

Kenda®'s sterile seed head also means it has low allergenic characteristics which reduces its likelihood of causing problems for allergy sufferers

Kenda® is an efficient water user and highly drought tolerant. It's an ideal choice for areas with low rainfall or council water restrictions.

Maintenance

- ☑ Cut to 2.5cm-5cm every 7-10 days in the warmer months, and every 3-6 weeks in cold months
- ☑ Fertiliser is recommended twice a year: once in early April and once in September

Kenda® Kikuyu is highly drought tolerant once established – but, like all plants, needs water. Requirements will vary depending on environmental factors. Be aware of a drying climate and water your lawn accordingly.

Remember, infrequent deep watering of your lawn promotes a healthy lawn and a strong deep-rooted system. Watering time is best in the early morning.

Shade tolerance	Low
Drought tolerance	High
Maintenance	High
Wear tolerance	Very high
Winter colour	8/10*
Cold tolerance	High
Best planting time	Anytime
Where it works best	South QLD, NSW, VIC, SA, WA
Soil type	Most soil types
Leaf	Fine-medium
Salt tolerance	Low
Seed head levels	Low

*Winter colour rating when fertilised.
Note: Lawn is a living product that performs differently in various environments and seasonal conditions.

Shade Tolerance	Drought Tolerance	Maintenance	Wear Tolerance
Low	**High**	**High**	**Very high**
