

Nara™ NATIVE ZOYSIA

Australian born and bred*

Very high drought tolerance. Very low maintenance.

Appearance

- ✓ Eye-catching deep green colour
- ✓ Soft to the touch and underfoot
- ✓ Fine-medium leaf
- ✓ Can be evergreen in winter and summer in many parts of Australia (with proper care)

Features

- ✓ Medium shade tolerance
- ✓ Very low maintenance
- ✓ Less mowing
- ✓ High wear tolerance
- ✓ Very high salt tolerance
- ✓ Natural resistance to pests and diseases
- ✓ Produces low seed head (a common irritant for people with allergies)

Climatic performance

- ✓ Very high drought tolerance
- ✓ Performs in heat and humidity
- ✓ Medium cold tolerance
- ✓ Perfect for coastal areas, including beachfront and waterfront properties
- ✓ Grows in most parts of Australia

Environmental benefits

- ✓ Australian native hybrid Zoysia*
- ✓ Low water usage
- ✓ Reduced insecticide, herbicide and fungicide requirements due to natural resistance
- ✓ Excellent erosion control properties

myhometurf.com.au

Nara™ Native Zoysia* is a true all-rounder that performs under tough conditions, without sacrificing on looks or feel.

Native to Australia*, **Nara™** is naturally equipped to handle hot, dry climates, humid conditions and even the cold Canberra climate, but has the added bonus of being soft to touch.

Evolution within the Australian environment has given it some distinct advantages – **Nara™** is an efficient water user and highly drought tolerant. It's an ideal choice for areas with low rainfall or council water restrictions.

Nara™ is also both naturally salt tolerant and more resistant to the pests and diseases that can affect Aussie lawns. It's perfect for coastal areas, and can be used for beach and waterfront properties.

Maintenance

- ✓ Cut to 2cm-5cm in sun, or 5cm-7cm in shade – lower cuts will resemble a Couch lawn, higher cuts will resemble a Fescue lawn with longer leaf blades
- ✓ Mow every 2 weeks in warmer months, and every 3-8 weeks in colder months
- ✓ Fertiliser is recommended twice a year, with an additional application if the lawn is subject to high levels of wear and tear

Nara™ Native Zoysia* is highly drought tolerant **once established** – but, like all plants, needs water. Requirements will vary depending on environmental factors. Be aware of a drying climate and water your lawn accordingly.

Remember, infrequent deep watering of your lawn promotes a healthy lawn and a strong deep-rooted system. Watering time is best in the early morning.

*Nara is a Native Hybrid Zoysia

| | |
|---------------------|---------------------------------------------------------------|
| Shade tolerance | Medium |
| Drought tolerance | Very high |
| Maintenance | Very low |
| Wear tolerance | High |
| Winter colour | 7/10* |
| Cold tolerance | Medium |
| Best planting time | Avoid laying** 15 th May – 15 th Aug |
| Where it works best | QLD, NSW, VIC, SA, WA, NT |
| Soil type | Most soil types |
| Leaf | Fine-medium |
| Salt tolerance | Very high |
| Seed head levels | Low |

*Winter colour rating when fertilised.
** We recommend you plant before May 1 in colder climates.
Note: Lawn is a living product that performs differently in various environments and seasonal conditions.
